

Homemade Rubber Stamp

Materials:

~Plastic lid (water bottle, laundry soap, mineral make-up containers)

~Styrofoam from an egg carton or cup

~Glue (strong craft glue or use a glue gun)

~Orange stick, toothpick, or similar carving tool

~Pen

~Scissors

~Ink pad

Directions:

1. Use a pen to trace the lid on the Styrofoam.
2. Cut out the circle.
5. Use your orange stick or cutting tool to carve a design. The simpler the better. Remember if you write a word it should be backwards so it will stamp properly.
3. Glue your Styrofoam on the flat surface of the lid.
4. Let dry.
5. Your stamp is now ready to use!
